the last Gazette you receive.

## KRR Rides Again

By: Cole Chance

That's right – the ore cart was roaring downhill for the January match. This month's Match Directors was the team of Geo Kid and his granddaughter Little Fawn. They not only had the ore cart roaring but lots of rip-roaring shot gunning too. I love a match with lots of shotgun! Maybe that's why me and Jessie get along so well – most of the time anyway! Geo Kid and Little Fawn. No harder working regulators in the KRR. Good job Cowboy and Cowgirl! I don't know if everyone is aware of this or not, but as a former Goat Roper and fairly new Junior shooter, this was already Little Fawn's second time being a co-Match Director. Where's all those club members who have been shooting for years when Sheriff Hawkeye goes hunting for Match Directors???

Fort Miller 2002 was given the go-ahead by club members. This means lots of hard work and hopefully lots of fun shooting for everyone. This match is for all shooters – not just some. This is your match KRR. So be there – enjoy it!

This year we have 2 new officers – Hawkeye O'Riley as Sheriff and Fargo as Blacksmith. These are both hard-working, loyal club members

and they deserve the support and assistance from ALL club members. Volunteer to be a Match Director, or give Hawkeye your ideas for scenarios and he can take it from there. Let him know what works and what doesn't. He needs your input. Don't be afraid to speak up, and don't be afraid to offer to put on a match, or at least a stage. Please come out for the work days and support Fargo in his efforts. Help our club to grow. I've said it over and over, and I'll say it again. No one person can do it all. For the club to grow and prosper, Hawkeye, Fargo, and all of the officers need your input, your help, your labor, and your ideas. Get involved!!!!

If you've noticed the work that's been done in Bay 8, everyone in the club owes a great big Thank You to Michigan Bob. Bob has given countless hours of his own time for the club. He did all the tractor work to enlarge Bay 8. This was done to prepare that bay to build our Fort Miller. Our match is called Fort Miller, and we have always thought we should have a real fort to make it perfect. So we are going to be

building one soon. When you get the word about the work party – make time to come out and help!

Thought for the day – Out where the handclasp's a little stronger, out where the smile dwells a little longer, that's where the west begins.

**KRR Work Party  
Sunday, February 10th  
8:00 A.M.**

**Bring your picks, post-hole diggers,  
hammers, shovels and  
lots of energy.**

**We'll be planting some  
trees, digging hole for  
sunshades and the  
fort, and anything else  
that needs doing.**

**The Blacksmith  
Fargo  
299-8409**

## Officers

Mayor: Cole Chance (Leon Chism)  
673-7416  
SASS #8243 KRR #26  
Sheriff: Hawkeye O'Riley (Jim Riley)  
638-6163  
SASS #6443 KRR #3  
Blacksmith: Fargo (Dennis Netzley)  
299-8409  
SASS #18631 KRR #93  
Banker: Jessie Montana (Barbara Chism)  
673-7416  
SASS # 8244 KRR #27  
Sec/Editor: Ruthless Ruth (Ruth Polman)  
251-9507  
SASS #9015 KRR #37  
Territorial Governor: Snakebite (Doug Gilmore)  
787-2943  
SASS #4767L KRR #01

## Winter Hours

**Shooters Meeting  
9:30**

**Shooting starts  
10:00**

## New Members

Judge Jeremiah Steele  
 Alias: David Moll  
 SASS # 42753

Rogan Steele  
 Alias: Marshall Moll  
 SASS # 42754

Rooster  
 Alias: Jess Boyce  
 SASS # 29768

Stella Star  
 Alias: Vicki Boyce  
 SASS # 43035

Marauder Mary  
 Alias: Mary Tiller

Pizmo Pete  
 Alias: Larry Sherfield  
 SASS # 33198

Choctaw Willie  
 Alias: Bill Hickman

Double Flush  
 Alias: Gary Nolan

That's a whole passel of new members for one month. Welcome to you all. Hope you find shooting with the KRR to your liking. We love to see new members joining because new ideas and new talents are what makes us grow as a club.

## ROUND THE CORRAL

By: Ruthless Ruth

Hay what happened to all our black powder shooters this month? We didn't have even one. Guess

They figured with all the fog the targets would be hard enough to see without adding any smoke.

Little Fawn shot her first match with the KRR as a Junior shooter. Shot on her posse and it looks like Grampa Geo has taught her a thing or two about gun safety and marksmanship, she did real well. Little Gunner was learning how to keep score under the watchful eye of Lady Gunner, nothing like learning the sport from the ground up.

Had a little help on this column for January from a shooter who may or may not want his name made public, (I'll have to check it out with Swanee Rivers later) and here's what he had to say:

- \* Ever since the range went on water meters, Double Flush is banned from the facilities.
- \* Leadfoot kept ejecting live rounds down his boots, now we know the rest of the story.
- \* Sudden shot duelist this month, even the rifle?? *I'd like to see that.*

With a little help from his son, Madera Dave won a collectors set of Long Ranger/Cheerios, complete with a Lone Ranger Lunchbox, after Sundays shoot. There was much discussion as to whether or not Cheerios go bad. Cole Chance finally settled the matter by stating that you could put really old ones in a bowl pour a little Budweiser over them and they were just as good as new. Everything is better with a Bud.

### The Truth in 13 Words

Inside every older person is a younger person wondering...  
 What the Heck Happened!!!!

# SASS EXTERNAL MODIFICATIONS COMMITTEE RECOMMENDATION

## RIFLES

SASS Cowboy Action Shooting™ competitions are divided into three separate types of matches as follows: main, team, and side matches. The rules relative to SASS approved firearms depends upon the type of competition in which you will be participating. The rules for main match and team event rifles are similar, but not identical, to the rules for side match competitions. All the rules and specific requirements for each type of competition are listed separately in the respective subsections.

### -- RIFLES --

#### MAIN & TEAM

#### MATCH COMPETITION

Rifles or carbines used in the main and team matches must be original or replicas of lever or slide action rifles manufactured during the period from approximately 1860 until 1899 incorporating a tubular feed and exposed hammer.

#### \* Rifle Calibers

- must be centerfire of at least .25 caliber or larger.
- must be in a "pistol" caliber. (examples include, but are not limited to, .32-20, .38 special, .38-40, .44-40, and .45 Colt. No "rifle" calibers such as .30-30 or .38-55 are allowed.)

#### \* Barrels

- may be rebored and chambered for any approved caliber.
- original barrels may be replaced with new barrels of correct styles (e.g., round, octagon, half-round), weights, and lengths that were originally factory available for that particular model rifle or carbine. Calibers as defined above.
- may be altered by machining or hand fitting to accept mounting hardware for an alternative tube magazine configuration and capacity appropriate to the model of firearm being altered.
- may be altered by machining or hand fitting to accept period style sights as allowed below.

#### \* Sights

- Only original or replica style open iron sights or tang mounted peep sights of the 1860 to 1899 period are allowed.

- original style sights available during the cowboy era may be substituted for existing factory supplied sights, providing they meet all the other sight rules. Modern style "click" adjustable barrel or receiver sights are not allowed. No receiver-mounted sight is permitted.

- must be made from materials available during the cowboy era and look "period." Example: ivory, brass, gold, or silver bead front sights of period design are allowable, however, the same design sight with an insert of modern "day-glow" or colored fiber optic plastics or similar materials are specifically not allowed.

- rear and front sights may be "blacked" with ink, paint, or smoke soot. Other colors of paint or colored sight inserts are not allowed on either front or rear sights.

#### \* Stocks

- may be replaced by shorter or longer length stocks providing they maintain the approximate original stock shape and contours that were factory available for that model firearm.

- Period style checkering is allowed on both fore stocks and butt-stocks.

- must be made out of materials that were generally available and used for stock making during the cowboy era.

- may replace the factory butt-plate with a period style, permanently fitted or lace on recoil pad, or change the butt-plate to a style that was generally available from the original manufacturer.

- may attach a piece of leather or similar natural material to the butt-plate.

#### \* Receivers

- no external modifications are allowed on receivers except where the upper tang is an integral part of the receiver and then only to drill and tap the upper tang to accept approved type tang sights. Engraving the receiver is permitted.

#### \* Levers

- "John Wayne" style levers may be substituted on Winchester Model 1892

and 1894 rifles for the standard factory lever.

- Levers may be wrapped with leather or other natural material.

### -- SHOTGUNS --

#### MAIN, TEAM, OR SIDE MATCH COMPETITIONS

Any side by side shotgun typical of the period from approximately 1860 until 1899 without automatic ejectors, with or without external hammers, having single or double triggers is allowed. Lever or slide action single barrel tubular feed, exposed hammer shotguns of the period are allowed, whether original or replicas. Certain shooting categories require a specific type of shotgun and ammunition to be used in those competitions. Please see the shooting categories for further information.

#### \* Barrels

- may be any length greater than 18".
- must be centerfire of at least 20 gauge and no larger than 10 gauge.
- may be replaced, rebored, or sleeved for any of the legal gauges listed above within industry safety limits.
- may have internal choke tubes installed provided they do not extend beyond the muzzle.

- may be altered by machining or hand fitting to accept period style sights as allowed below.

#### \* Sights

- front sights may be bead or simple post types typical of the era.

- must be made from materials readily available and of a style commonly used during the cowboy period from approximately 1860 until 1899 (e.g., ivory, brass, gold, or silver bead front sights of period design are allowable, however, the same design sight with an insert of modern "day-glow" or similar materials is specifically not allowed).

#### \* Stocks

- may be replaced by shorter or longer length stocks providing they maintain the

continued from page 7

approximate original stock shape and contours that were factory available for that model firearm.

- Period style checkering is allowed on both fore stocks and butt-stocks.

- must be made out of materials that were generally available and used for stock making during the cowboy era.

- may replace the factory butt-plate with a permanently fitted, slip-on, or lace-on rubber or leather recoil pad, or change the butt-plate to a style that was generally available from the original manufacturer.

- may attach a piece of leather or similar natural material to the butt-plate.

\* Receivers

- no external modifications allowed. Engraving is permitted.

\* Levers

- Levers may be wrapped with leather or other natural material.

\* Ammunition

- number 4 lead birdshot or smaller must be used in all competitions. No steel or plated shot allowed.

- light field or target loads are recommended for all competitions. No magnum or high velocity rounds are allowed.

- pump and lever action shotguns are allowed to load no more than two rounds at a time in the main match stages unless specified in the stage description. Single loading the pump or lever action shotguns is always acceptable. In team events shotguns may be loaded to their maximum capacity.

-- REVOLVERS --

MODIFICATIONS AND RESTRICTIONS

Originals and replicas of full size single action revolvers manufactured during the period from approximately 1860 until 1899 and the SASS approved modern category revolvers are the only revolvers approved for use in SASS main match competition. The rules relative to SASS approved revolvers and pistols depend upon the competition category in which you will be participating. Examples of SASS approved revolvers for each category are listed in the Handbook.

Regardless of the model or approved type, revolvers shall be maintained in as

original exterior condition as possible, and must look period. The only allowed exceptions are listed below:

\* Pistol Calibers

- Must be center fire, calibers of at least .32 caliber or larger.

- must be in a "pistol" caliber (examples include, but are not limited to, .32-20, .38 special .44-40, and .45 Colt).

\* Barrels

- may be rebored or lined to any of the approved calibers.

- original barrels may be replaced with new barrels of period styles, weight, and length.

- No heavy competition or "Bull barrel" is allowed.

\* Sights Note: Sights are a major factor for determining in which category a revolver may be used.

- Traditional

< only traditional style barrel mounted fixed iron foresights of a simple blade or post configuration are allowed. A simple open notched rear sight cut into the frame, hammer, or latch mechanism is the only rear sight allowed. 1872 Open Tops have a legal, open notched rear sight mounted on the back of the barrel. Only Allowed Exceptions: Original cap and ball revolvers, those converted to "cartridge" and their modern made replicas may have either a dovetail front or rear sight, and they must conform to the types commonly found on the originals. Any other revolver by whatever manufacturer or model that has a dovetailed rear sight, whether movable or adjustable, is a "Modern" category revolver.

- Frontier Cartridge and Frontiersman

< Same as the Traditional Category.

- Modern

< may have factory installed dovetailed or adjustable rear sights and/or dovetailed front sights.

- Sights, all categories

< may raise or lower the front sight to bring point-of-aim and point-of-impact into alignment. The general contour of the sight shall remain as per the original.

< may serrate the back of the front sight

< may change the shape of the rear sight notch on Colt Single Action 'Armies and Bisleys and their replicas from the "V" to a "U" configuration.

< colored sights and sight inserts are not allowed.

< sights may be "blackened" by either ink, paint, or smoke "soot." Black is the only color allowed and then only in the immediate area of the sights.

\* Stocks or Grips

- Contemporary rubber grips, modern target grips, and grip tape are not allowed. Replacement grips of wood, ivory, pearl, stag horn, bone, and the like are acceptable so long as they are not severely customized to constitute a "target" grip. That is, they must be of original profile and scale.

\* Grip Frame modifications

- Birdshead grip frames and grips may be installed on any SAA, its modern replicas, or Ruger Vaqueros.

- You may "round the grip profile" of any SASS revolver

\* Frame modifications

- rear sight modifications as per above rules

- Ruger Blackhawk frames may be modified by removing the rear sight assembly, welding up the sight cutout, recontouring the frame top strap and cutting a new sight notch to replicate a Colt SAA frame. The reconfigured frame is mated with a conventional Ruger Vaquero type barrel and the original grip frame assembly.

\* Other modifications

- Colt style bullseye or crescent ejector rods may be installed on Rugers.

- You may shorten the head of Ruger cylinder pins.

- You may apply a light bead blasted finish to the exterior of any SASS revolver.

- You may bevel the front of the cylinder of any Colt SAA, its modern replicas, and Rugers.

- Cosmetic engraving is acceptable so long as it does not constitute a competitive advantage. You may engrave your alias on the backstrap. You may not checker or stipple any portion of the grip frame.

- Trigger shoes, compensating ports, counterweights, and all other such modifications are not allowed.

\* Interchangeability of Parts Rule

- You may interchange any part from one revolver to another revolver of the same SASS shooting category and from the same manufacturer if the part or parts can be exchanged without major modifi-

continued on pg 5

# SASS LONG RANGE RIFLE POLICY COMMITTEE RECOMMENDATION

SASS long range or precision rifle competition is different than main match rifle competition with more emphasis placed on precision shooting at longer ranges, with time being a secondary scoring factor. Scoring for these matches is determined by the number of hits, with either of two methods used to break ties. At the match director's option, either total time used to shoot the required number of shots or a shoot-off may be used to break ties.

There are four categories in long range or precision rifle competition, plus one optional category:

- Lever action, pistol caliber
- Lever action, rifle caliber
- Single Shot
- Buffalo Single Shot
- Open class (may be used at the match directors option to include those firearms not covered by the four official Long Range Categories)

Blackpowder categories can be added to any or all of the basic categories at the option of the match director. The Buffalo Single Shot is blackpowder or blackpowder substitutes only. Each category competes within itself.

## Basic Rules for the Long Range Competitions

· Front barrel sights may vary from simple blades to period hooded wind gauge designs using interchangeable sight inserts and having a spirit level mounted

integral with the sight or sight base.

· Rear sights must either be open iron sights mounted on the barrel or original style tang or stock wrist mounted peep sights. Long range rear barrel mounted sights of the flip-up ladder type may use a peep-hole drilled through the sliding sight leaf. An example of this is the various ladder type sights used on the Springfield trapdoors.

· Optical and receiver mounted sights are not allowed.

· "Rifle Caliber" competition rifles must use traditional, period, rimmed cartridges. No cartridge chambered for use in any SASS approved main match pistol or rifle may be used in the "Rifle Caliber" competition. Thus, .30-30 WCF, .38-55 Marlin & Ballard, .43 Spanish, or .45-70 Government cartridges would be legal, while a .375 Winchester, .444 Marlin, .32-20 WCF, or .44-40 WCF would not be legal.

· Any SASS approved propellant, including smokeless, Pyrodex, and blackpowder may be used (with the exception smokeless powder is not allowed in the Buffalo Single Shot competition).

· Regardless of category or caliber, bullets used in long range and precision rifle matches must be made of pure lead or lead alloy having a plain base, gas checked, or paper patched configuration. Muzzle velocities are restricted only by safety considerations. Extremely high velocities tend to work to the shooter's disadvantage.

**Lever Action Rifles** used in long-range matches, whether pistol or rifle calibers, must be originals or replicas of rifles manufactured during the period from approximately 1860 until 1899. Lever or slide action, tubular feed, exposed hammer rifles or carbines are allowed, providing they are in safe working condition. Note: The rifles must have an exposed hammer and a tubular magazine, thus eliminating the use of a Winchester Model '95 and a Savage Model 1899 or other similar rifles having a box or rotary magazine.

**Single Shot and Buffalo Single Shot** firearms must be originals or replicas of single shot rifles manufactured during the period from approximately 1860 until 1899. All rifles **MUST** have exposed hammers. The caliber and cartridge rules for the "Rifle Caliber" firearms noted above under basic rules also apply to Single Shot and Buffalo Single Shot rifles with the exception that Buffalo Single Shot rifles must be .375" caliber or larger.

**Buffalo Single Shot** competition has further restrictions requiring original or replica rifles to be of a pre-1899 design of US manufacture with exposed hammer. Spring-loaded ejectors are also prohibited, except for Springfield Trapdoor Rifles.

(Continued from page 4)

TERRITORIAL BULLETIN

cation to either firearm or the part. The only modifications allowed would have to be accomplished with simple hand tools (e.g., hacksaw and files) and not by machining, welding, grinding, or major recontouring or external shaping of any parts. Some examples of this rule are: the exchange of a Single Action Army grip frame with an 1860 Army frame and vice versa, the exchange of a Ruger Bisley Grip frame assembly and hammer on a Vaquero, and the exchange of a Ruger Super Blackhawk hammer with a standard Ruger Blackhawk hammer. As in the last example noted, you could not replace the hammer on a Ruger Vaquero with a Ruger Super Blackhawk hammer because you would be moving a part from a "Modern" category revolver to a "Traditional" category revolver.

\* A stage disqualification is issued for use of any non-legal SASS firearm at matches above the club level.

PHYSICALLY DISADVANTAGED SHOOTERS MAY MAKE MODIFICATIONS TO THEIR FIREARMS THAT WILL ALLOW THEM TO OPERATE THEIR FIREARMS SAFELY THROUGH THE FULL RANGE OF MOTIONS NECESSARY TO COMPETE IN A COWBOY ACTION SHOOTING™ MATCH.

NO FIREARMS MAY BE USED IN MAIN, TEAM, OR SIDE MATCHES THAT CONFLICT WITH ANY OF THE RULES LISTED IN THIS SUBSECTION. NO MODIFICATIONS OR ALTERATION OTHER THAN THOSE LISTED ABOVE MAY BE INCORPORATED ON FIREARMS USED IN MAIN, TEAM, OR SIDE MATCHES.
